Subject: IMP Configuration Cards.

Configuration information regarding the IMP Software is specified on peripheral ("PRPH") configuration cards. The peripheral configuration card affecting the IMP Software will have the identifier "IMP".

The "information" field of the peripheral specification will be used for debugging and for specifying global parameters to the IMP software. Unless directed otherwise, this field should contain a zero (0).

Current Configuration Cards

Service Configuration

PRPH A IMP 40 0 * SERVICE, NO DEBUGGING

Development Configuration

PRPH A IMP 23 0 * DEVELOPMENT, NO DEBUGGING
