SUBJECT: DEVELOPMENT MACHINE PRIORITY

This MSB obsoletes MCB-857

The following priority list shall be used as a guide to the scheduling
of the 645 Development Machine. The sign-up system currently in effect
will continue to be used; however, when necessary, people working on
projects of lower priority may need to be rescheduled.

The priorities are as follows:

1.   Repair of hardware or software problems that affect
        645 Service performance or reliability.

2.   Software development to complete Phase II of the Storage
        System Enhancements project.

3.   Software development on the 645 that is required as part
        of the plan for 645F Multics but must be done on the 645.

4.   Software or Hardware development to integrate the Bulk
        Store.

5.   Software Development that is part of Storage System En-
        hancements Phase III, the "low cost" service project, or the
        the Tape software project.

6.   All other projects.
