Identification

td\_write7  
T. P. Skinner

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

## Function of Entry:

To output a file in 7punch format. The data is formatted and calls made to the tape dcm.  
td\_write7\$one will write only the first record.

## Calling Sequence for Entry:

```
call td_write7(ioname, datap, usrcnt,error);  
call td_write7$one(ioname,datap,usrcnt,error);
```

## Declaration of Arguments:

```
dc1 ioname char(32),  
    datap ptr,  
    (usrcnt,  
    error) fixed bin(17);
```

## Description of Arguments:

ioname - name of tape drive.  
datap - pointer to data to be written  
usrcnt - word count  
error - 0 (no error)  
 2 (tape error)
