Identification

ascii_gebcd
T. P. Skinner

(Note that the following is an Abstract, which should
be replaced by a full description at a later time.)

Function of Entry:

Convert an ASCII character string to GE or IBM BCD.

Calling Sequence for Entry:

call ascii_gebcd (in,m,out,n,rcode);

Declaration of Arguments:

```
dcl  (in,                    /* input data ptr*/
      out) ptr,              /* output data ptr*/
      (m,                    /* input character
                                count*/
      n)fixed                /* output character
                                count*/
      rcode fixed;           /* non zero if error*/
```

Description of Arguments:

above
