Identification

BLK_EQL
B. Wolman

(Note that the following is an Abstract, which should
be replaced by a full description at a later time.)

Function of Entry:

compares two blocks of storage for equality

Calling Sequence for Entry:

eql = blk_eql (p1, p2, size);

Declaration of Arguments:

```
dcl  eql        bit(1)         /* "1"b if blocks are identical */
     (p1, p2) ptr,            /* pointers to blocks */
     size       fixed bin(17);/* size of blocks (in words)
                                 size = 0 ⇒ eql = "1"b */
```

Description of Arguments:

above
